

NEW CUSTOM LEAD SERIES

The New Custom Lead Series by Hiwatt feature an all valve pre-amp and all valve power amp. The Custom Lead Series pre-amp has an all new high gain overdrive for that growling sound and bite obtainable at any volume. The bass, treble, middle and presence controls provide ample tone variations for any stage, studio or style. Hiwatt amplifiers are extremely quiet because of the extensive shielding and high quality components inside. Each unit is hand assembled and tested for up to 72 hours to burn in all components and to assure a high standard of quality control for true perfection.

Two types of specially designed speakers: FANE or CELESTION

Fane speakers: Countless hours went to produce this superb speaker exclusively for Hiwatt. Growling yet punchy and articulate, this speaker sings out harmonies with ease and distinction. It's sure to be a classic.

Celestion speakers: Another legend, the very special 12-70m is a vintage sounding speaker tailored after the sound of the old 25 watt Celestion for that unique sound Celestion is famous for. They now have a 70 watt power handling capacity each.

Both types of speaker are front loaded in the cabinet with heavy-duty, quick-release clamps.

The NEW Custom Lead Series from Hiwatt available in 50 watt, 100 watt heads and 50 watt one twelve combos. Special orders welcome.

Fane or Celestion Speakers
